SUMMARY

Software Engineer with 1.5+ years of experience building and maintaining production web applications using React, TypeScript, Java, Spring Boot, and Python. Experienced in developing REST APIs, integrating external systems, designing relational databases, and improving application performance. Comfortable working across the frontend and backend, writing automated tests, debugging issues, and delivering reliable software in Agile teams.

WORK EXPERIENCE

Software Development Engineer I **GrowthJockey, Gurugram** *Jul 2025 – Present*

- Built and maintained a React 19 admin application with role based access control across 10+ modules, integrating 50+ REST APIs and reducing administrative task time by 40%.
- Integrated ERP APIs to automate order synchronization, eliminating 100% of manual processing and reducing fulfillment errors by 90%.
- Developed scheduled Java and Spring Boot jobs to collect analytics data and load it into PostgreSQL, automating reporting workflows and resolving JDBC and Hibernate schema validation issues.
- Designed PostgreSQL schemas and optimized SQL queries for quotation and inventory systems, using relational constraints and object oriented design principles to maintain data integrity.
- Worked on automated testing, code reviews, debugging, and defect resolution across development, testing, and production environments, helping resolve 70+ UAT defects.
- Deployed a RAG powered AI chatbot for SleepyHug that autonomously resolves 40–50% of inbound customer support queries.
- Developed a self service blog CMS and migrated 800+ posts without broken routes. Improved six product pages through server side rendering and image optimization, contributing to 25% higher conversions over 90 days.

Software Engineer Intern **GrowthJockey** *Jan 2025 – Jun 2025*

- Integrated 10+ third party REST APIs with structured error handling and Vite code splitting, reducing unhandled production failures to zero.
- Developed and shared 15+ reusable UI components aligned with WCAG 2.1 accessibility guidelines, helping reduce cross team feature delivery time by 35%.
- Collaborated on sprint planning, code reviews, API documentation, and QA and UAT activities, using Git branching and Jenkins based CI/CD workflows.

EDUCATION

National Institute of Technology, Manipur *Jun 2025*
Bachelor of Technology in Computer Science and Engineering **CGPA: 8.6/10.0**

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL
Frontend: React.js, React 19, Next.js, Tailwind CSS, Server Side Rendering
Backend: Spring Boot, REST APIs, Hibernate/JPA, JDBC, Node.js, Express.js
Databases: PostgreSQL, MySQL, Relational Database Design, SQL Optimization
Testing: JUnit, Jest, React Testing Library, Unit Testing, Integration Testing, Functional Testing, QA and UAT
Cloud and DevOps: AWS, Docker, Jenkins, CI/CD, Linux, Git, Postman
Engineering Practices: Object Oriented Programming, Design Patterns, Code Reviews, Debugging, Documentation, Agile/Scrum

PROJECTS

Quotation Management System | *Java Spring Boot, PostgreSQL, React, TypeScript* *2025*

- Developed a quotation management platform with a Java Spring Boot backend and PostgreSQL database, structuring business logic with Repository, Builder, Mapper, and Facade design patterns.
- Built a status driven Kanban board to track quotations from requested and sent to expiring, expired, or rejected states, with a React and TypeScript interface.

OttoTask: Ticketing and Workflow System | *Java Spring Boot* *2026*

- Built a multi tenant ticketing platform used across the company, supporting account and ticket management, priority based workflows, approval gates, blocked states, and SLA tracking.
- Developed an analytics dashboard to track completion rates, average turnaround time, and monthly throughput, alongside a points and leaderboard system for team performance.
